PROFESSIONAL SUMMARY

Frontend Developer with 4+ years of experience building and maintaining production applications with React and TypeScript. Specialized in frontend architecture, microfrontends, real-time communication, and performance optimization within a fully remote product team.

CORE TECHNICAL SKILLS

Core: React, TypeScript, JavaScript, Single-SPA, Microfrontends

Architecture & Performance: IndexedDB, Web Workers, List Virtualization, Storybook

State, UI & Testing: Redux Toolkit, Zustand, Material UI, Tailwind CSS, Jest

Real-Time & APIs: WebSockets, WebRTC, REST APIs

Backend & Cloud: Node.js, Express, MongoDB, AWS Cognito, Azure DevOps, Git

PROFESSIONAL EXPERIENCE

Full Stack Developer

Trii Software | Jul 2022 - Present | Remote

Enterprise SaaS platform for omnichannel communication, chat, ticketing, and business operations.

- Microfrontend architecture: Introduced Single-SPA, migrated approximately 10 modules, and mentored two teammates on adoption.
- Omnichannel product delivery: Built approximately 90% of a chat feature spanning WhatsApp, Facebook, and Instagram, then refactored it into a decoupled architecture.
- Frontend performance: Implemented cache-first loading with IndexedDB and Web Workers plus list virtualization, cutting chat load times to near-instant.
- Reusable platform tooling: Built a shared Single-SPA chat parcel and an internal React component library distributed through Storybook and npm, reducing duplication across modules.
- Real-time systems: Built chat, notifications, and live data updates using WebSockets.

EDUCATION

Technical Degree in Software Development | ITEC | 2021 - 2024
